

WEATHER FORECASTING SYSTEM

A

MAJOR PROJECT-II REPORT

Submitted in partial fulfillment of the requirements

for the degree of

BACHELOR OF TECHNOLOGY

in

COMPUTER SCIENCE & ENGINEERING

By

GROUP NO.06

Aleena Khanam 0187CS211018

Baishnavi Sharma 0187CS211048

Diksha Rupani 0187CS211065

Under the guidance of

Prof. Shumali Gupta

(Assistant Professor)

Department of Computer Science & Engineering
Sagar Institute of Science & Technology (SISTec), Bhopal (M.P)

Approved by AICTE, New Delhi & Govt. of M.P.
Affiliated to Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal (M.P.)

June -2025

Sagar Institute of Science & Technology (SISTec), Bhopal (M.P)

Department of Computer Science & Engineering

CERTIFICATE

We hereby certify that the work which is being presented in the B.Tech. Major Project-I Report entitled **WEATHER FORECASTING SYSTEM**, in partial fulfillment of the requirements for the award of the degree of **Bachelor of Technology**, submitted to the Department of **Computer Science & Engineering**, Sagar Institute of Science & Technology (SISTec), Bhopal (M.P.) is an authentic record of our own work carried out during the period from Jan-2025 to Jun-2025 under the supervision of **Prof. Shumali Gupta**.

The content presented in this project has not been submitted by me for the award of any other degree elsewhere.

Aleena Khanam
0187CS211018

Baishnavi Sharma
0187CS211048

Diksha Rupani
0187CS211065

This is to certify that the above statement made by the candidate is correct to the best of my knowledge.

Date:

Prof. Shumali Gupta
Project Guide

Dr. Amit Kumar Mishra
HOD, CSE

Dr. D.K. Rajoriya
Principal

ACKNOWLEDGEMENT

We would like to express our sincere thanks to **Dr. D. K. Rajoriya, Principal SISTec and Dr. Swati Saxena, Vice Principal SISTec** Gandhi Nagar, Bhopal for giving us an opportunity to undertake this project.

We also take this opportunity to express a deep sense of gratitude to **Dr. Amit Kumar Mishra, HOD, Department of Computer Science & Engineering** for his kindhearted support.

We extend our sincere and heartfelt thanks to our guide, **Prof. Shumali Gupta**, for providing us with the right guidance and advice at crucial junctures and for showing us the right way.

I am thankful to the **Project Coordinator, Prof. Deepti Jain**, who devoted her precious time in giving us the information about various aspects and gave support and guidance at every point of time.

I would like to thank all those people who helped me directly or indirectly to complete my project whenever I found myself in any issue.

TITLE	PAGE NO.
Abstract	i
List of Abbreviation	ii
List of Figures	iii
Chapter 1 Introduction	1
1.1 Introduction	1
1.2 Challenges in Traditional Weather Monitoring	1
1.3 The Role of IOT in Weather Monitoring	2
1.4 The Role of Machine Learning in Weather Forecasting	2
1.5 Objective of The Report	2
1.6 Methodology	3
1.6.1 Data Description	3
1.6.2 Target and Objectives	4
1.6.3 Machine Learning Algorithm for Temperature Prediction	4
1.6.4 Data Processing Workflow	5
1.6.5 Potential Application	5
Chapter 2 Software & Hardware Requirements	6
Chapter 3 Problem Description	8
Chapter 4 Literature Survey	10
Chapter 5 Software Requirements Specification	12
5.1 Functional Requirements	12
5.2 Non-Functional Requirements	13
5.3 Performance	13
5.4 Security	13
5.5 Usability	14
Chapter 6 Software and Hardware Design	15
6.1 Architecture	15
6.2 Data Flow Diagram	16
Chapter 7 IoT Module	17
7.1 Pre-processing Steps	17
7.2 Data Visualization	17
7.3 IoT Model Description	18
7.4 Result Analysis	22
Chapter 8 Coding	23
Chapter 9 Result and Output Screens	27
Chapter 10 Conclusion and Future work	34

Project Summary

Appendix-1: Glossary of Terms

ABSTRACT

The Weather Forecasting System is an advanced project designed to predict atmospheric conditions using real-time meteorological data. The system utilizes a combination of data sources, including satellite imagery, weather stations, and online APIs, to gather critical information such as temperature, humidity, pressure, wind speed, and precipitation. With the help of machine learning algorithms and statistical models, the system processes this data to generate accurate short-term and long-term weather forecasts. The application aims to assist in daily planning for individuals, businesses, and government agencies by providing reliable weather predictions. The project also emphasizes the importance of data accuracy, system scalability, and user-friendly interfaces to ensure accessibility for diverse user groups.
